

The best calculators are HPs. (either the HP 10B, 10BII or the older HP 12C)
The 12C isn't as popular as it utilizes "reverse polish notation"...in other words, there is no "equal" sign.

The good thing about the HP10B or HP10BII is that they can be bought at many of the Office Depot/Office Max/Best Buy type stores.

HP 10B or HP10BII

Try to discourage the use of any Texas Instruments Financial Calculator. I can work with them but there are so many different models and none work the same.

The newer/next generation "Calculated Industries" Real Estate Master IIIx is great....see below:
